

5.) Malga San Silvestro and the Lachwiesen Hut

Length: 27.71 km

Altitude: 734 m

Endurance: 🚴🚴🚴

Technique: 🚴

Views: 🚴🚴🚴🚴

This ride is challenging at first. From Dobbiaco is a long uphill stretch of about eight kilometres up to Malga San Silvestro. There are two fairly demanding sections, but for the rest it is a gentle climb along the rushing San Silvestro stream. After a short break at the original hut we can enjoy the silence of the alpine pasture with just the occasional melodious sound of the cowbells. We return to Dobbiaco going up and down through the woods and along paved roads. During the ride we will be treated to stunning views of the Dolomiti di Sesto and of Valle Pusteria.
